HOW TO FIND NUMBERS DIVISIBLE BY 4

Finding numbers divisible by 4 is very tricky. It used to be;

“If the last 2 numbers are divisible by 4, then your number is divisible by 4”.

But this would not be the case, for those who can't find numbers divisible by 4, so this is the new way.

Form a table with 4 columns from 0 - 9

A	B	C	D
0	1	2	3
4	5	6	7
8	9		

The most important columns are A and C

Recognize that odd numbers go with column C and even numbers go with column A

TO CHECK;

Here are multiples of 4

12

56

136

84

788

60

48

As seen, odd numbers go with 2 and 6, while even numbers go with 0, 4 and 8.

That's how to check if numbers are divisible by 4
